IT SUPPORT | MICROSOFT 365 | NETWORKING | CYBERSECURITY

PROFESSIONAL SUMMARY

Computer Security graduate with professional experience in telecommunications engineering, network operations, technical troubleshooting, firewall management, security monitoring, and infrastructure support. Hands-on practical experience with Active Directory user and group management, password resets, account troubleshooting, Microsoft 365 administration, Exchange Online, Teams, SharePoint, OneDrive, and remote support tools, including lab practice. Experienced in monitoring network performance and security events, assessing network exposure, and using Python automation. Developed a Python-based low-interaction honeypot to detect and log unauthorized connection attempts.

PROFESSIONAL EXPERIENCE

Engineer – Level 1
IBT Designers Engineering (Pvt) Ltd · Colombo, Sri Lanka | Feb 2026 – Present

- Organized and cleaned up firewall security rules for a core network facility and developed a Python script to automate part of the process.
- Assessed company and partner networks for publicly exposed systems and documented IP addresses, network ranges, and responsible teams.
- Monitored security dashboards for potential cyberattacks, including DDoS activity, and escalated findings to relevant teams.
- Monitored network performance, system alerts, and security events; investigated abnormal conditions and supported issue resolution.
- Assisted with installing and configuring new servers and security systems during infrastructure upgrades.

International Roaming Outsourced Level 1 Engineer
Mobitel (Pvt) Ltd · Colombo, Sri Lanka · Remote | Feb 2026 – Present

- Perform international SIM and service testing against GSM, CAMEL, LTE, VoLTE, and 5G criteria while coordinating with multiple international telecom partners.
- Perform quality testing for international networks to verify service performance against required standards.
- Investigate service-related issues and support troubleshooting activities to maintain reliable roaming services.

International Roaming Engineering Trainee
Mobitel (Pvt) Ltd · Colombo, Sri Lanka | Jul 2025 – Jan 2026

- Monitored KPI metrics and network alarms, including security-related alarms, to support performance optimization and early issue detection.
- Led SIGOS testing for MO/MT voice, SMS, and data browsing across 2G/3G/4G (CAMEL/LTE) networks, validating roaming interoperability.
- Analyzed and resolved security-related alarms using Hawkeye/Comfone systems; developed roaming configuration files and automated Excel-based routing and SIM inventory tools.
- Executed CAMEL testing on global SIMs, troubleshot roaming connectivity issues, and built PNET lab simulations for network testing.

IT SUPPORT & MICROSOFT ADMINISTRATION – PRACTICAL SKILLS

Active Directory user and group management · Password resets and account troubleshooting · Microsoft 365 administration · Exchange Online · Microsoft Teams · SharePoint · OneDrive · Remote support tools · Active Directory / Microsoft 365 lab practice

EDUCATION

BSc (Hons) in Computer Security · University of Plymouth | Oct 2022 – Dec 2025
Plymouth University curriculum delivered at NSBM Green University, Sri Lanka

SELECTED TECHNICAL PROJECT

Low-Interaction Honeypot · Python · Tkinter · Multithreading · SQLite · Network Security

- Developed a Python-based low-interaction honeypot to detect and log unauthorized connection attempts across SSH, HTTP, and MySQL ports.
- Implemented multithreaded socket handling, real-time event logging, SQLite storage, and a Tkinter monitoring interface; tested in isolated virtual machines.

CERTIFICATIONS & SECURITY TRAINING

Aviatrix Certified Engineer – Multicloud Network Associate · Aviatrix · Oct 2025 | Offensive Security Intro · TryHackMe · Jun 2026 | Pentesting Fundamentals · TryHackMe · Nov 2025 | Linux Fundamentals · TryHackMe · Nov 2025 | Defensive Security Intro · TryHackMe · Jun 2025

CORE TECHNICAL SKILLS

IT & Systems: Active Directory, Microsoft 365, Exchange Online, Teams, SharePoint, OneDrive, Windows, Windows Server, Linux, remote support tools
Networking: International Roaming, GSM, CAMEL, LTE, VoLTE, 5G, Packet Core, TCP/IP, OSPF, BGP, HSRP, MPLS, QoS/SLA validation
Security: Firewall rule management, security monitoring, intrusion detection, DDoS monitoring, network exposure assessment, Nmap, Wireshark, Metasploit
Programming & Data: Python, automation, Tkinter, Git, GitHub, MySQL, MongoDB, SQLite, Excel-based automation
Platforms & Labs: VMware, GNS3, PNET
